

# Tobias and the Angel work by Kingsmead Primary School 2010

Creative work by Nursery to Year 6 classes  
Also a collaborative piece completed by all 244 children in the school

# Nursery

We have created our own versions of the painting "Tobias and the Angel" using oil pastels

We looked at the painting "Tobias and the Angel" and created our own angel wings using different materials

We made detailed drawings of our hands using charcoal, chalk and coloured oil pastels

# Reception

# Year 1

- Year 1 children talked a lot about the father of Tobias being blind and the remedy that was going to cure his blindness. We became very interested in how blind people read and use their 'touch' sense. We decided to take a section of the painting and use tactile resources to create the art piece, so blind people could feel the piece. We created our initials of our names to make the angel wings. The wings are made up of every Childs first name in our class.

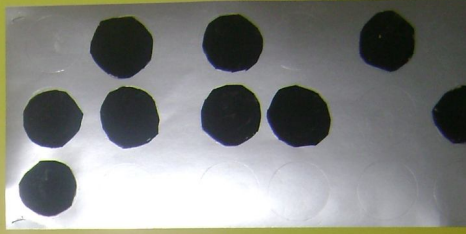

Tobias

We made the title 'Tobias and the Angel' in Braille.

and

the

Angel

Can you work it out using the Braille alphabet?

# Year 2

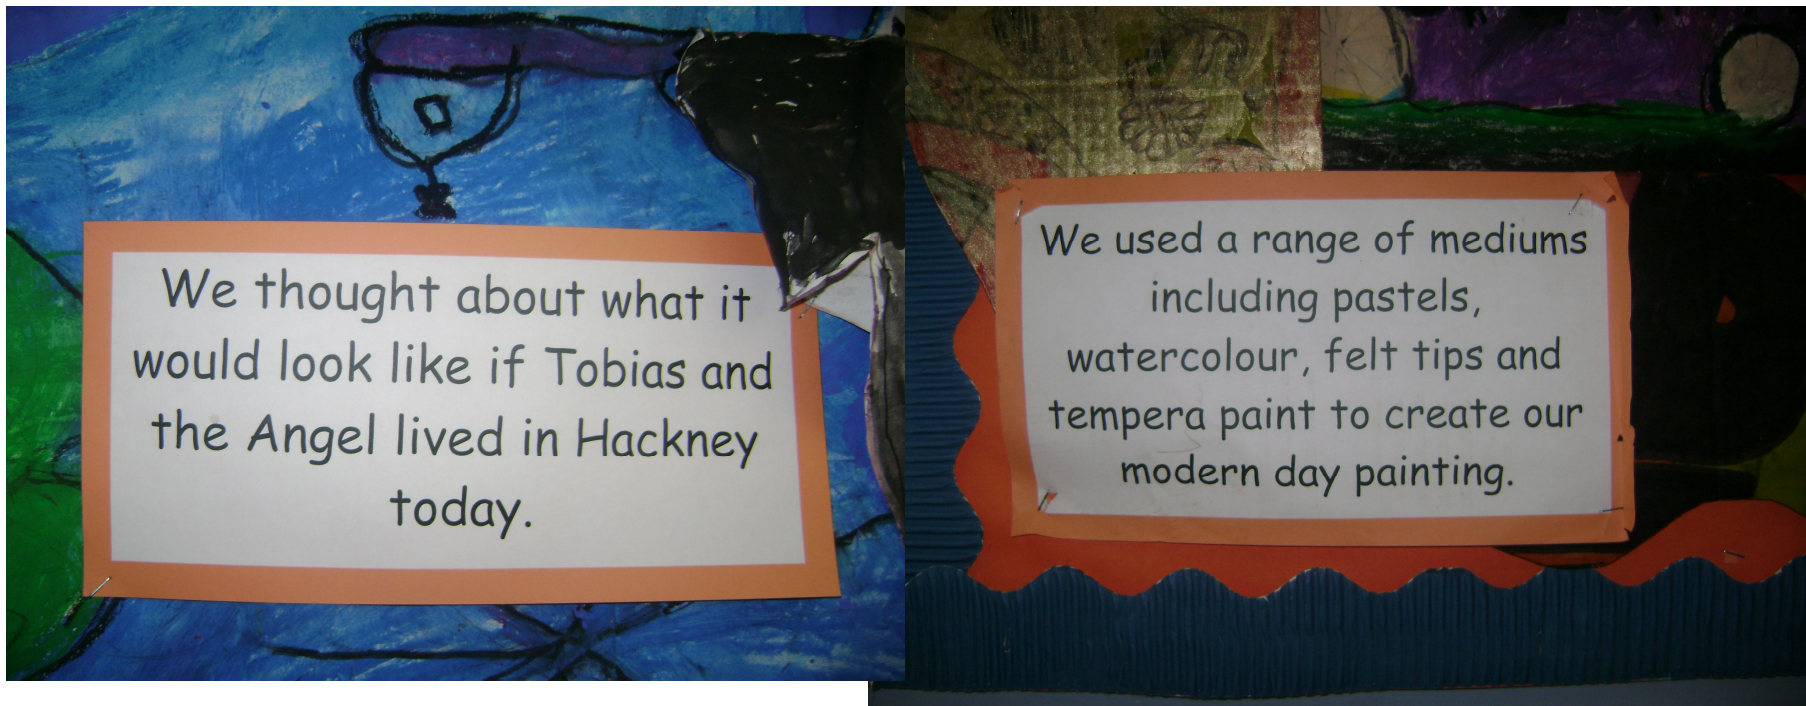

- Year 2 children made 3D devices that are used for communicating in the 21<sup>st</sup> century. What would Tobias and the Angel use today to send a message?

# Year 2

A collaborative piece by Year 3  
Modern version of Tyrell and the Angel walking  
through the Hackney Estate.

# Year 3

# Tyrell and the Angel

We thought about what it would look like if Tobias and the Angel lived in Hackney today.

# Year 4

We researched on the internet different settings that we could put Tobias and the Angel into. We then printed them out with props we thought Tobias and the Angel would be carrying in their new settings.

We used different materials to collage our Tobias and the Angel in different settings.

# Mosaic style by Year 6

# Collaborative Art piece

## **Kingsmead Angels**

All staff and visual artists had an inset session together to discuss ideas for a collaborative piece that could be placed outdoors. Teachers discussed ideas with their class in circle time. The school council then had the final decision and worked with the visual artists on organising the resources and classes. They decided recycled materials and materials that were waterproof would be suitable for the piece to survive outdoors. Everyone in the school collected plastic bags, bottle tops, corks and straws etc. We also created a book of Angels, that every designed their own angel.

Within the last two years, 2 children and 1 adult have sadly passed away in our school. This has really touched our school and our community, therefore we were inspired by the angel in the picture, to create a Kingsmead Angel to go in our memorial garden.

# Kingsmead's Angel
